

Osun Baby-Shield (RS0030)

Fashionable Maternity Camisole/Tank with Radiation Shield.
Ultimate Protecting for the baby from all Electromagnetic Fields Radiations!

Do you know you are exposed to more and more Electromagnetic Field (EMF) radiation that may cause harm to your unborn baby's health and well-being? This maternity camisole/tank will protect your baby from this danger.

About EMF

Electric and magnetic fields (EMF) have different properties and different ways of causing harmful biological effects. Some people become ill from many types of EMF sources, such as alarm clocks too close to their bed, sitting too close to a TV or computer, or using a cell phone. Reported symptoms are headaches, arm and leg tingling, dizziness, difficulty in concentrating, nausea, and even more serious problems. When an expecting mom walks around the office and home and gets close to strong EMF radiation sources, the baby may be affected as well.

Osun's Baby-Shield is specially designed for expecting moms who need to work near computers or operate household appliances on daily basis. It can be worn as underwear or as an inner layer underneath professional dresses. Fit all 3 trimesters!

User Instructions

1. After putting the camisole on, adjust the shoulder straps so that the Baby-Shield fits comfortably around the belly.
 2. Put on outer layer or professional dresses as normal.
- You can now walk around the house/office and do your daily routine knowing that your baby is well protected by the Baby-Shield!

Specifications

Ultra strong shielding capability: unique cutting-edge high-tech blend shielding 100% of cell phone signals and almost all other daily Electromagnetic Fields radiations up to 60DB from these sources: cell phones, microwave oven, TV, computer, home appliances, and office appliances.

360 degree coverage for all 3 trimesters: 36 inches at chest; 49.6 inches at belly and 24 inches long. Fitted design. **S/M** maternity sizes.

Silky smooth, soft, and elastic **nylon/silver blend** with classic lace trim offers versatile wear and feminine charm.

Breathable and comfortable jersey construction keeps you cool even in the summer.

Maintenance

To protect the shielding material and keep the best shielding capabilities: Hand wash cold with mild soap. Delicate cycle. Line Dry. Do not bleach. Do not twist. Do not iron. Do not fold tightly.

Reduce exposures to EMF

Remember that the EM field radiated from an appliance drops off dramatically in strength with increased distance from the source. There are a number of ways to reduce harmful exposure to EMF. Some are as easy as standing back from an appliance when it is in use.

If the measured radiation level of a cell phone is high, consider using shielded accessories. If the problem persists, you may want to switch to another cell phone or service company. Cell phone radiation levels vary from phone to phone and from company to company.

Computer users may want to switch to flat panel display since these monitors emit less EMF than the conventional CRT type of display. Other EMF reduction steps, such as correcting a household wiring problem, are worth doing for safety reasons. The traditional way of grounding electrical devices is to connect them to water pipes. However, today's pipes are mostly plastic and do not provide good grounding. One suggestion is to find a pure metal pipe and redo the wiring. It is wise to reduce as much as possible the time spent near known sources of strong EMF. Turn off all electrical appliances when you aren't using them.

Warranty: One year
